Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group 1: depth adjustment mechanism at the proximal side of the device:

Species 1: Fig. 3 (thread connection between 72 and 74 as adjustment mechanism).

Species 1: Fig. 10 (spring 4, protrusion 82 and holes 86 for depth adjustment) .

Species 2: Fig. 11 (grooves 90 and ridges 98 connection for depth adjustment).

Species 3: Fig. 19 (adjustment mechanism including screw 152 in cavity of element 38).

Species 4: Fig. 20 (adjustment mechanism including turn key 168 in the cavity of element 38).

Group 2: depth adjustment mechanism at the distal end of the device housing:

Species 5: Fig. 14 (thread connection between 20A and 20B for depth adjustment).

Species 6: Fig. 15 (adjustment mechanism including spring 120, spacer 178).

Species 8: Fig. 17 (adjustment mechanism including finger 136 and stopper 134).

Species 9: Fig. 18 (adjustment mechanism including finger 142 and stopper 140).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claim 20 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Mr. Türk on 4/16/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Response to the Applicant's Traverse

The restriction is made so as to clarify the differences between Groups and Species of inventions as indicated above.

The Examiner acknowledges that the invention shown in Fig. 7 could be a distinct invention. However, the inventions in the application appear mainly about different mechanisms for adjusting a depth penetration. Therefore, the restriction as indicated above should be more proper.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 703-306-3420. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J Milano can be reached on 703-308-2496. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
